

March 18 Statement from the Stonewall Kickball DC Leadership Team on COVID-19 (Coronavirus)

To our SKDC family:

The rapidly evolving global response to the COVID-19 pandemic means that our local response must evolve. The Centers for Disease Control and Prevention (CDC) issued guidelines this week urging Americans to limit social gatherings to 50 people. As a result, the Stonewall Sports National Board has mandated Stonewall Sports chapters across the country to suspend all sporting and event activities for four weeks (until April 13). The national board will evaluate current guidance from the CDC and health authorities to make an informed decision on how we move forward after April 13.

At this time we ask that teams suspend **ALL** in-person activities, to include practices, until further notice.

The national board will update chapters on April 1 regarding the status of the National Tournament. The Stonewall Kickball - DC Leadership Team will provide another update to the league at that time. Please know that the leadership team is in regular communication with one another and planning for multiple scenarios. For now, our top priority is the health and safety of all our members and loved ones.
